Hejian Sanlong Petroleum Machinery Co., Ltd

ABOUT US

Sanlong Petroleum: Professional oil drilling tools manufacturer

Since its establishment in 2014, Sanlong Petroleum has been committed to building the world's leading manufacturer of oil drilling tools. With professional technology and excellent quality, we provide high quality for water well drilling, oil well drilling, gas well drilling, geothermal well drilling, mining, geological exploration, hydrological detection, trenchless underground pipe network engineering and basic engineering and other fields around the world. services.

The products we produce, such as single Tricone drill bit, roller tricone drill bits and PDC drill bits, Winning the trust of customers with its excellent performance and quality. Our tricone drill bits, scraper drill bits and HDD hole expander are deeply loved by users for their extraordinary durability and efficiency.

Sanlong Petroleum not only has advanced R&D capabilities and sophisticated CNC machine tool processing equipment, but also has professional R&D personnel and production teams, which provide our products with strong competitiveness. Our team always adheres to customer demand-oriented and constantly carries out technological innovation and quality improvement.

We know that the success of an enterprise lies not only in the superiority of its products, but also in its persistent pursuit of quality. Therefore, we have passed SGS certification and ISO9001:2008 certification and so on, to ensure that every link and process meets or even exceeds customer expectations.

Today, Sanlong Petroleum has been exported to many countries and serves the global oil drilling industry. We will continue to adhere to the concept of "professionalism, innovation, quality and service" to provide better products and better services to customers around the world.

In the future, Sanlong Petroleum will continue to be committed to R&D and innovation, continuously launch more advanced drilling tools, help customers improve efficiency, reduce costs, and contribute to the prosperity and development of the global oil drilling industry.

Choosing Sanlong Petroleum means choosing professionalism, quality and success. Let us work together to create a better future!

PDC BIT

IADC	Applicable Stratum
S/M222 S/M223	Suitable for soft formations such as marl, salt rock, and shale.
S/M323 S/M333	Suitable for medium and soft formations such as shale, sandstone, and chalk.
S/M423 S/M433	Suitable for medium-hard bottom layer, siltstone, basalt.

TRICONE BIT Steel Tooth Bits

IADC	Applicable Stratum
116/117/124/125 127/136/137	Suitable for soft formations with low compressive strength and high drillability, such as shale, clay, salt rock, soft limestone
211/214 216/217	Suitable for medium hardness with high compressive strength and hard interlayers, such as hard shale, sandstone, limestone, etc.

TRICONE BIT Insert Tooth Bits

IADC	Applicable Stratum
417/437/447	Suitable for soft formations with low compressive strength and high drillability, such as clay, mudstone, gypsum, and soft limestone
517/537	Suitable for soft to medium-soft formations with low compressive strength, such as shale, clay, sandstone, soft limestone, salt rock, anhydrite
617/637	Suitable for hard to ultra-hard formations with high compressive strength, such as sandstone, limestone, dolomite, anhydrite, and marble stone
